**B&W Production Printer** 

## RICOH Pro 8300s

www.electronicofficesystems.com PH: (973) 808-0100
330 Fairfield Road Fairfield, NJ 07004

## Drive more productivity from a smaller footprint

Your organization depends on cost-efficient, reliable, user-friendly black-and-white printing, copying, scanning and sharing. With space at a premium, the RICOH Pro 8300s was designed to deliver the productivity you need in a more compact footprint to make sure every user can meet their needs quickly and easily. Supporting a broad range of media — including colored papers — and the finishing options you rely on to make educational materials, business documents and customer communications crisp and professional, this system increases the efficiency of producing any job. The new, tablet-like 17" Smart Operation Panel, robust Paper Library and intuitive controls ensure that even novice users can achieve outstanding results every time.

## Spend less time and energy for great results

Produce projects in-house with razor-sharp text, lines and images in black-and-white at up to 1200 × 1200 dpi resolution. Do it fast, with output up to 96 pages per minute and a total paper capacity of up to 8,800 sheets\* with optional trays to make shorter work of long print jobs. Meet environmental goals and control total operating cost with a device that is ENERGY STAR® certified, meets EPEAT® Gold\*\* criteria and prints on a wide variety of media from plain paper to cover stocks. The system is backed by Ricoh's extensive National Field Services team to ensure your system is up and running when you need it most.

\*Optional LCIT RT5130 and BY5020 Bypass Tray is required. \*\*EPEAT rating is applicable only in the USA.

## Professional results at high volumes

Rely on predictable performance at up to 1,000,000 pages per month with pristine results, project after project. Uniform toner particles create smooth halftones and gradations for precise results on charts, graphs, photos and line drawings, whether producing customer letters, policy manuals, classroom handouts, testing materials or flyers. Choose from a range of automated, business-critical finishing options, including stapling, hole-punching and saddle-stiching, to save time and deliver a professional image at the touch of a button. Whether working in a business, healthcare or educational environment, make the right impression with every document you print.

## Capture, store and share documents securely

Keep information moving — and safe. Use one-pass scanning to capture both sides of the page at up to 220 images per minute, or enjoy the convenience of scanning pages from books and manuals on the glass platen. The RICOH Pro 8300s makes information storage and sharing simple to support document-heavy workflows in legal, healthcare, enterprise and education environments. Choose from a wide range of delivery options — including Scan-to-email, folder, URL and more — to store and distribute important files, or save directly to a USB or SD card. From digitizing records to making reproductions for meeting handouts and course-packs, share information in the format that makes the best sense for your audience.

# Satisfy the varied needs of teams in education, business, government and beyond

## The media choices you're counting on

The RICOH Pro 8300s provides the media support for a robust range of stocks from 52 to 300 g/m²\* to help you deliver your message most effectively. Print on sheets up to 13"  $\times$  19.2"\* for low-cost booklets, trifolds, classroom posters, technical documentation and more. The improved Contact Image Sensor (CIS) recognizes a wider range of colored papers, so you can further help documents stand out on a broad range of colored media and retain rich blacks in text and graphics.

\*Optional LCIT RT5110 is required.

## User-friendly controls, apps and automation

The tablet-like 17" Smart Operation Panel provides more than a clear view; it shares the same library of productivity applications your staff members are accustomed to using on Ricoh office printing devices. Create short-cuts and customized icons for preconfigured settings on frequently produced jobs to complete them fast and in fewer steps, whether simply printing on specific substrates or finishing projects with stapling or saddle-stitching. Use the robust Paper Library to get predictable, repeatable results. Choose your specific paper and the system will select the best settings automatically to deliver optimal printing quality. Thumbnail previews allow you to confirm jobs prior to printing to reduce costly rework and reprints.

## Rely on active and passive data security

There is no room for compromise when it comes to data and document security, and the RICOH Pro 8300s offers the administrative tools to help meet rigid security requirements. Restrict access to confidential information with User Authentication, and rely on Secure Socket Layer (SSL) and HDD encryption to help protect information from tampering and hackers automatically. Ricoh's DataOverwriteSecurity System (DOSS) renders latent information on the hard drive as unreadable. Opt for RICOH @Remote to collect meter data, generate detailed production reports and automate service alerts in order to manage your business even more closely and effectively.
